

British military and industry logistics collaboration

PA Consulting invites the Royal Logistic Corps Foundation to the PA Global Innovation and Technology Centre

02 October 2024 | 10:00-15:00, Melbourn, Hertfordshire, SG8 6DP

Context

The MOD faces challenges to deploy and support operations, both within the UK and overseas at scale. There are issues of capacity, capability and expertise that require significant industry support and input to achieve its needs over the short, medium and long term.

Format

The aim of this day is to run workshops targeting key themes relating to the British military and industry relationship. We will discuss current and future logistic challenges and propose industry innovations and technologies to support the development of a collaborative solution to some of these challenges.

We will run 3 workshops to discuss and consider:

- Military capability gaps
- Industry capability support for those gaps
- Learning and Development opportunities to widen understanding

Tour of PA's Global Innovation and Technology Centre

Highlighting the R&D and technology capability that PA can bring to its clients in delivering solutions to client challenges.
