

Pearson BTEC Level 3 Diploma in Professional Competence for IT and Telecoms Professionals

Course Aim

The Army Intermediate Apprenticeship in Professional Competence for IT and Telecoms aims to provide a qualification that enables individuals to progress their Army Logistics career. The Apprenticeship includes a Level 3 Diploma qualification where the individual will demonstrate their competence and understanding against a set of units based on the needs of the communication requirement.

Entry Eligibility

Communications Specialist Class 2.

Duration

18 months.

Cost and Payment

Course costs are covered by Government funding (ESFA) therefore free for the Learner.

Method of Delivery

The Army Apprenticeship blends the training delivered during the Class 2 course with practical work activities completed in the Learner's Field Army Unit. Delivery is a combination of face-to-face direct contact and remote support via phone/email/Skype etc.

Modules

Modules are based on the Communication Specialist role. Typically, there are 8 units to complete (2 mandatory and 6 optional) ranging from health and safety, communication, security and working with ICT hardware and equipment.

Assessment

Assessments will be completed in the work place, at a Pearson TQ Learning Resource Centre (LRC) or remotely via phone/Skype etc. Knowledge requires the Learner to identify, describe and explain in detail either by writing, typing or verbal (best and most efficient way) and the performance requires the production of evidence that the criteria/standard is achieved. Assessment methods used include observation, Q&A, formal testing, witness testimonies and work-based discussions.

Tutor Support

All learners will be allocated a Training Officer (TO) who will provide full support to the learner as required and additional support for Functional Skills (FS) is given by a specialist.

Equipment Required

No equipment is formally required to complete the apprenticeship unless remote assessment/support is needed. At each LRC there are computers available if learners would like to produce typed work.

Enrolment Process

Conducted during the Communications Specialist Class 2 course.
